

Avantis 'Twin-Fix' Cylinder Guard

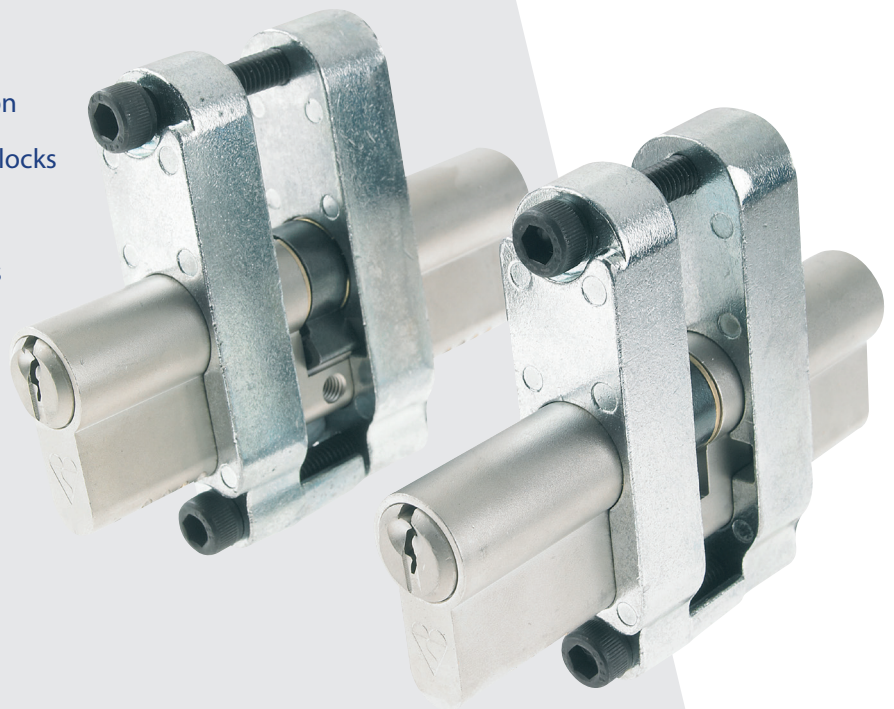

Secured by Design accredited cylinder protection system

The Avantis 'Twin-Fix' is the only cylinder guard to employ 2 M6 high security bolts to ensure complete accredited protection of the cylinder from sustained physical attack, whilst the anti-separation bar ensures that the cylinder cannot be removed in the event of the cylinder being snapped.

Working exclusively with Avantis multi-point door locks, the Avantis 'Twin-Fix' cylinder guard also ensures that landlords and home owners will be able to easily change cylinders without the risk of damaging the door in cases where keys have been lost.
