

Beautifully Integrated. Brilliantly Practical.

Integral blinds are seamlessly sealed within the double-glazed unit of the window, eliminating the need for the regular dusting and maintenance associated with traditional blinds.

They offer the perfect balance of privacy, glare reduction and natural light, allowing you to enjoy a bright, comfortable living or working space without compromising your view.

The aluminium slats can be raised, lowered and tilted to give you complete control over light levels and privacy throughout the day. Whether you want to soften harsh sunlight or shield your home from overlooking neighbours, integral blinds provide a practical, low-maintenance solution. If you prefer to avoid obscured glass that permanently restricts your outlook, integral blinds are the ideal choice.

WHITE

CREAM

SILVER

We offer 3 different blind colours for 24mm double glazed units.

BENEFITS

- ✓ Ensures total protection against dirt, dust or weather conditions and therefore do not require any maintenance.
- ✓ Designed with safety in mind with no cords.
- ✓ Easy to operate using rechargeable battery powered actuators.
- ✓ Slats are available in a range of 3 colours.
- ✓ Venetian style blinds with high quality aluminium slats.
- ✓ Ease of installation; already installed inside the sealed units.
- ✓ Optimum control of light and heat in rooms.
